Long-term Preservation Food

Kameda Seika Group's long-term preservation products are made from 100% Japanese rice. free of all 28 specified allergens in Japan, and Halal certified, which can be used by a variety of people in the event of an emergency. Due to the recent disasters, personal stockpile purchase is increasing alongside the purchases by local governments and private companies. In addition to use as a disaster stockpile, our products are also popular as a handy food for mountain climbers and overseas travelers.

Japanese Space Food Certification to

Onisi Foods has been participating in the Japanese Space Food Project of the Japan Aerospace Exploration Agency (JAXA) since 2005 to offer "Japanese Space Food" to Japanese astronauts staying at the International Space Station (ISS). In 2007, four of Onisi's alpha rice products were certified by JAXA as "Japanese Space Food." They met advanced criteria such as hygiene, safety, long shelf life, and being lightweight. Onisi is developing products with a dream in mind that, in the near future, anyone might be able to go to space with ease.

Lactic Acid Bacteria

Kameda Seika Co., Ltd. has developed plant origin lactic acid bacteria. They are select lactic acid bacteria that have cleared strict standards from more than 300 strains of lactic acid bacteria derived from rice and fermented plant foods. Since it is a heat-killed form, it can be blended into a variety of food products with no change in the product's taste due to line contamination or acid formation. Please make use of this product for the development of

health foods.

KAMEDA

"RiceEX" is a brand of Functional Ingredients derived from Rice, discovered through years of research by the Rice Expert Kameda Seika. Rice, which Japanese people have long been familiar with, has been known to have various health benefits.
